In response to the International Convention on Biological Diversity, The Stavanger Botanical garden and The Rogaland Arboretum supply seeds to other botanical gardens and research institutions on the following conditions:

- 1) The seeds are used for the common good in the areas of research, education, conservation and the development of botanical gardens;
- 2) Information on the material is appropriately stored, and the connection between the information and the material is maintained;
- 3) If scientific publications on the plant material provided are produced, the origin of the material must be cited. In addition, these publications are expected to be sent to the garden.
- 4) Permission must be sought from the Stavanger Botanic Garden or The Rogaland Arboretum if the recipient seeks to commercialise either the genetic material, its products or research derived from it. Such commercialisation will be subject to the conditions of a separate agreement with the country of origin.

Orders received for seeds or other plant material are taken as acceptance of these conditions.
